

GETTING STARTED

AC-5000 Series

Colposcope

Prepare for installation, learn the controls and organise the documentation for your AC-5000 Series.

Preparation guide · 14 September 2026

A preparation guide for trained healthcare teams. Use the operating instructions supplied for your unit and complete the appropriate training before clinical use.

- 01 Confirm the manual edition**

Record the AC-5000 configuration and ask Alltion Australia for the operating manual that matches your optics, stand and camera.
- 02 Review assembly and handover**

Use the installation video and your operating manual as preparation for supplier setup. Have mounting, balance, movement and wiring checked with the delivered accessories.
- 03 Learn the controls**

During training, locate the binocular adjustments, focus, magnification, dimming and camera controls. Practise the viewing setup on a non-clinical target.
- 04 Check the capture workflow**

Ask for a test of still capture, recording and export on your camera version. If PC software is included, confirm its version and compatible capture hardware separately.
