

GETTING STARTED

AM-5000 Series

Surgical Microscope

Prepare for installation, learn the controls and organise the documentation for your AM-5000 Series.

Preparation guide · 14 September 2026

A preparation guide for trained healthcare teams. Use the operating instructions supplied for your unit and complete the appropriate training before clinical use.

- 01 Identify the installed optics**

Record the AM-5000 configuration, objective, binocular, camera and any FORA or assistant-scope options. Confirm the supplied setup against the manufacturer brochure.
- 02 Plan the handover**

Review the AM-5000 introduction with the person installing the system. Ask them to demonstrate mounting, arm movement, balance and locking with your chosen accessories.
- 03 Learn viewing and illumination**

During training, practise the magnification, objective, binocular and light controls on a non-clinical target. Have any optional imaging modes explained for the supplied unit.
- 04 Confirm documentation**

Check capture, playback and export with the installed camera. Store the current operating manual and service details where the clinical team can find them.
