

GETTING STARTED

AM-6000 Series

ENT Microscope

Prepare for installation, learn the controls and organise the documentation for your AM-6000 Series.

Preparation guide · 14 September 2026

A preparation guide for trained healthcare teams. Use the operating instructions supplied for your unit and complete the appropriate training before clinical use.

- 01 Confirm the ENT setup**

Record the AM-6000 mounting type, binocular, objective and camera. The series brochure includes several configurations; confirm which apply to your ENT installation.
- 02 Review the installation video**

Use the series video to prepare for supplier installation. Ask the installer to check the support, movement, balance and cable routing with the fitted accessories.
- 03 Complete a configured-unit handover**

Have viewing position, focus, zoom, illumination and locks demonstrated on your unit. Use a non-clinical target for familiarisation and follow the supplied operating instructions.
- 04 Check imaging and support**

Where imaging is fitted, test capture and export with the matching camera guide. Record service contact details and the maintenance requirements supplied with your microscope.

Your Reference Material
